

CONTENTS

Foreword to Volume I by Joel S. Demski	xv
Preface to Volume I	xvii
Preface to Volume II	xxi
16. Introduction to Performance Evaluation	1
16.1 An Illustration of a Principal-agent Relationship	3
16.2 Basic Single-period/Single-agent Settings	7
16.2.1 Optimal Contracts	7
16.2.2 <i>Ex Post</i> Reports	10
16.2.3 Linear Contracts	12
16.2.4 Multiple Tasks	14
16.2.5 Stock Prices and Accounting Numbers	16
16.3 Private Agent Information and Renegotiation in Single-period Settings	18
16.3.1 Some General Comments	18
16.3.2 Post-contract, Pre-decision Information	19
16.3.3 Pre-contract Information	20
16.3.4 Intra-period Renegotiation	22
16.4 Multi-period/single-agent Settings	24
16.4.1 Full Commitment with Independent Periods	24
16.4.2 Timing and Correlation of Reports in a Multi-period <i>LEN</i> Model	25
16.4.3 Full Commitment with Interdependent Periods	26
16.4.4 Inter-period Renegotiation	29
16.5 Multiple Agents in Single-period Settings	30
16.5.1 Multiple Productive Agents	30
16.5.2 A Productive Agent and a Monitor	33
16.6 Concluding Remarks	35
References	35

PART E PERFORMANCE EVALUATION IN SINGLE-PERIOD/SINGLE-AGENT SETTINGS

17. Optimal Contracts	39
17.1 Basic Principal-agent Model	40
17.1.1 Basic Model Elements	40
17.1.2 Principal's Decision Problem	42
17.1.3 Optimal Contract with a Finite Action and Outcome Space	44

17.2 First-best Contracts	45
17.3 Risk and Effort Aversion	48
17.3.1 Finite Action Space	49
17.3.2 Convex Action Space	59
17.3.3 Convex Outcome Space – The Mirrlees Problem	68
17.3.4 Randomized Contracts	71
17.4 Agent Risk Neutrality and Limited Liability	73
17.5 Concluding Remarks	78
Appendix 17A: Contract Monotonicity and Local Incentive Constraints	79
Appendix 17B: Examples that Satisfy Jewitt’s Conditions for the Sufficiency of a First-order Incentive Constraint	86
Appendix 17C: Characteristics of Optimal Incentive Contracts for HARA Utility Functions	88
References	92
18. Ex Post Performance Measures	95
18.1 Risk Neutral Principal “Owns” the Outcome	96
18.1.1 A -Informativeness	98
18.1.2 Second-order Stochastic Dominance with Respect to the Likelihood Ratio	105
18.1.3 A Hurdle Model Example	111
18.1.4 Linear Aggregation of Signals	115
18.2 Risk Averse Agent “Owns” the Outcome	120
18.3 Risk Averse Principal “Owns” the Outcome	124
18.3.1 Economy-wide and Firm-specific Risks	125
18.3.2 Hurdle Model with Economy-wide and Firm-specific Risks	131
18.4 Costly Conditional Acquisition of Information	135
18.5 Concluding Remarks	147
Appendix 18A: Sufficient Statistics versus Sufficient Incentive Statistics	148
References	150
19. Linear Contracts	153
19.1 Linear Simplifications	154
19.2 Optimal Linear Contracts	158
19.2.1 Binary Signal Model	159
19.2.2 Repeated Binary Signal Model	161
19.2.3 Multiple Binary Signals	164
19.2.4 Brownian Motion Model	166
19.3 Concluding Remarks	179
References	180

20. Multiple Tasks and Multiple Performance Measures	181
20.1 Basic Multi-task Model	182
20.1.1 General Formulation of the Principal’s Problem	182
20.1.2 Exponential Utility with Normally Distributed Compensation	184
20.2 Allocation of Effort Among Tasks with Separable Effort Costs	186
20.2.1 A “Best” Linear Contract	186
20.2.2 The Value of Additional Performance Measures	190
20.2.3 Relative Incentive Weights	192
20.2.4 Special Cases	193
20.2.5 Induced Moral Hazard	201
20.3 Allocation of Effort Among Tasks with Non-separable Effort Costs	210
20.4 Log-linear Incentive Functions	216
20.5 Concluding Remarks	218
References	219
21. Stock Prices and Accounting Numbers as Performance Measures	221
21.1 <i>Ex Post</i> Equilibrium Stock Price	222
21.2 Stock Price as an Aggregate Performance Measure	224
21.3 Stock Price as Proxy for Non-contractible Investor Information	228
21.3.1 Exogenous Non-contractible Investor Information	230
21.3.2 A Fraction of Privately Informed Investors	231
21.3.3 Comparative Statics	238
21.4 Options Versus Stock Ownership in Incentive Contracts	246
21.4.1 Optimal Incentive Contract	246
21.4.2 Incentive Contracts Based on Options and Stock Ownership	251
21.5 Concluding Remarks	255
References	256

PART F

**PRIVATE AGENT INFORMATION AND RENEGOTIATION
IN SINGLE-PERIOD/SINGLE-AGENT SETTINGS**

22. Post-contract, Pre-decision Information	259
22.1 The Basic Model and the Revelation Principle	259
22.2 The Hurdle Model	266
22.3 Perfect Private Information	267
22.4 Imperfect Private Information	270

- 22.4.1 Some Benchmarks 270
- 22.4.2 Examples of Private Imperfect Information with
and without Communication 274
- 22.5 Is an Informed Agent Valuable to the Principal? 277
- 22.6 Delegated Information Acquisition 282
- 22.7 Sequential Private Information and the Optimal Timing of
Reporting 286
- 22.8 Impact of Disclosure on the Information Revealed
by the Market Price 292
- 22.9 Concluding Remarks 303
- References 304

- 23. Pre-Contract Information – Uninformed Principal Moves First** 305
 - 23.1 Basic Model 305
 - 23.2 Perfect Private Information 308
 - 23.3 Imperfect Private Information 313
 - 23.4 Mechanism Design 323
 - 23.4.1 Basic Mechanism Design Problem 324
 - 23.4.2 A Possibility of No Private Information 332
 - 23.4.3 To Be or Not to Be Informed Prior to Contracting . . . 335
 - 23.4.4 Impact of a Public Report on Resource Allocation . . . 337
 - 23.4.5 Early Reporting 342
 - 23.5 Concluding Remarks 348
 - Appendix 23A: Proof of Proposition 23.6 349
 - References 351

- 24. Intra-period Contract Renegotiation** 353
 - 24.1 Renegotiation-proof Contracts 355
 - 24.2 Agent-reported Outcomes 363
 - 24.3 Renegotiation Based on Non-contractible Information 366
 - 24.3.1 Renegotiation after Unverified Observation
of the Agent’s Action 367
 - 24.3.2 Renegotiation after Observing a Non-contractible,
Imperfect Signal about the Agent’s Action 368
 - 24.3.3 Information about Outcome before Renegotiation . . . 371
 - 24.4 Private Principal Information about the Agent’s Performance 371
 - 24.5 Resolving Double Moral Hazard with a Buyout Agreement . 376
 - 24.6 Concluding Remarks 378
 - References 379

PART G
CONTRACTING IN MULTI-PERIOD/SINGLE-AGENT SETTINGS

25. Multi-period Contracts with Full Commitment and Independent Periods	383
25.1 Basic Model	385
25.2 Aggregate Consumption Preferences	391
25.2.1 An “Effort Cost” Model with Exponential Utility	391
25.2.2 An “Effort Disutility” Model	394
25.3 Time-additive Preferences	398
25.3.1 No Agent Banking	398
25.3.2 Agent Access to Personal Banking	403
25.4 Multi-period <i>LEN</i> Model	407
25.4.1 The Agent’s Preferences and Compensation	408
25.4.2 The Agent’s Choices	410
25.4.3 The Principal’s Contract Choice	419
25.5 <i>T</i> Agents versus One	421
25.5.1 Exponential <i>EC</i> Utility Functions	421
25.5.2 <i>ED</i> Utility Functions	422
25.6 Concluding Remarks	426
Appendix 25A: Two-period Hurdle Model Examples	427
Appendix 25B: Proofs	432
References	436
26. Timing and Correlation of Reports in a Multi-period <i>LEN</i> Model	439
26.1 Impact of Correlated Reports in a Multi-period <i>LEN</i> Model	440
26.1.1 Impact of Report Timing on the Agent’s Utility with Exogenous Incentive Rates	440
26.1.2 Impact of Report Timing on the Principal’s Optimal Expected Net Payoff	445
26.1.3 A Single Action with Multiple Consumption Dates	447
26.1.4 Multiple Actions and Consumption Dates	453
26.2 Two Agents versus One	458
26.3 Concluding Remarks	463
References	463
27. Full Commitment Contracts with Interdependent Periods	465
27.1 Basic Issues in Sequential Choice	467
27.1.1 A Two-period Model with Interdependent Periods	467
27.1.2 Stochastic Interdependence	470
27.2 Stochastically Independent Sufficient Performance Statistics	472
27.2.1 Orthogonalization: Achieving Stochastic Independence	473

27.2.2 Normalization: Obtaining Zero-mean Statistics	478
27.3 Information Contingent Actions	481
27.3.1 Optimal Contracts	482
27.3.2 A <i>QEN</i> Contract of Indirect Covariance Incentives . . .	490
27.4 Learning About Effort Productivity	498
27.4.1 A <i>QEN-P</i> Model	499
27.4.2 A Hurdle Model of Productivity Information	506
27.5 Concluding Remarks	512
References	512
28. Inter-period Contract Renegotiation	513
28.1 Replicating a Long-term Contract by a Sequence of Short-term Contracts	515
28.1.1 Basic Elements of the FHM Model	517
28.1.2 Main Results	523
28.2 Interdependent Periods with Joint Commitment to Employment	526
28.2.1 Performance Measure and Payoff Characteristics	526
28.2.2 Optimal Renegotiation-proof Contracts	528
28.2.3 Endogenous <i>QEN-P</i> Models of Inter-period Renegotiation	536
28.2.4 Comparative Statics Given Identical Periods	541
28.3 Interdependent Periods with No Agent Commitment to Stay .	552
28.4 One versus Two Agents with Interdependent Periods	559
28.5 Concluding Remarks	563
Appendix 28A: FHM Production Technology Assumptions	565
Appendix 28B: Proofs of Propositions	567
References	569

PART H
CONTRACTING WITH MULTIPLE AGENTS IN
SINGLE-PERIOD SETTINGS

29. Contracting with Multiple Productive Agents	573
29.1 Partnerships Among Agents	575
29.1.1 Basic Partnership Model	575
29.1.2 Second-best Contract Based on Aggregate Outcome .	577
29.1.3 Second-best Contract Based on Disaggregate, Independent Outcomes	581
29.1.4 Second-best Contract with a General Partner	583
29.2 Basic Principal/Multi-agent Model	587
29.2.1 The Principal's Problem	587

29.2.2 Independent Performance Measures	589
29.2.3 Contracting with Agents with Correlated Outcomes . .	590
29.2.4 Two-agent Model with Perfectly Correlated Hurdles . .	591
29.3 Hierarchical Agencies with Decentralized Contracting	597
29.3.1 Efficient Contract Delegation	598
29.3.2 Inefficient Contract Delegation	600
29.3.3 Centralized versus Decentralized Contracting with an Aggregate Performance Measure	605
29.3.4 Disaggregate Local Information	606
29.4 Multiple Agents with Pre-contract Information	609
29.4.1 Independent Contracts	610
29.4.2 Contracting on the other Agent’s Outcome	612
29.5 Concluding Remarks	617
References	618
30. Contracting with a Productive Agent and a Monitor	619
30.1 Contracting with an Informed Worker and a Costly Monitor . .	620
30.1.1 The Basic Worker Model	620
30.1.2 Contracting with a Worker and a Fully Informable Monitor	623
30.1.3 Contracting with a Worker and a Partially Informable Monitor	626
30.2 Contracting with a Productive Agent and a Collusive Monitor	628
30.2.1 The Basic Model	629
30.2.2 A Costless, Truthful, Imperfect Monitor	632
30.2.3 Collusion and the Reward Mechanism	640
30.2.4 The Use of an External Monitor to Deter Lying by an Internal Monitor	646
30.3 Concluding Remarks	651
References	652
