## Contents

<b>1</b>	<b>Introduction to Internal Friction: Terms and Definitions</b>	1
1.1	General Phenomenon	1
1.2	Types of Mechanical Behaviour	2
1.3	Anelastic Relaxation	3
1.4	Thermal Activation	5
1.5	Other Types of Internal Friction	7
1.6	Measurement of Internal Friction	8
<b>2</b>	<b>Anelastic Relaxation Mechanisms of Internal Friction</b>	11
2.1	Introduction	11
2.2	Point Defect Relaxation	11
2.2.1	The Snoek Relaxation	12
2.2.2	Relaxation due to Foreign Interstitial Atoms (C, N, O) in fcc and Hexagonal Metals	28
2.2.3	The Zener Relaxation	32
2.2.4	Anelastic Relaxation due to Hydrogen	36
2.2.5	Other Kinds of Point-Defect Relaxation	48
2.3	Dislocation Relaxation	50
2.3.1	Intrinsic Dislocation Relaxation Mechanisms: Bordoni and Niblett–Wilks Peaks	51
2.3.2	Coupling of Dislocations and Point Defects: Hasiguti and Snoek–Köster Peaks and Dislocation-Enhanced Snoek Effect	61
2.3.3	Other Kinds of Dislocation Relaxation	73
2.4	Interface Relaxation	77
2.4.1	Grain Boundary Relaxation	78
2.4.2	Twin Boundary Relaxation	82
2.4.3	Nanocrystalline Metals	83
2.5	Thermoelastic Relaxation	87
2.5.1	Theory	87

X        Contents

2.5.2	Properties and Applications of Thermoelastic Damping .....	90
2.6	Relaxation in Non-Crystalline and Complex Structures .....	95
2.6.1	Amorphous Alloys .....	97
2.6.2	Quasicrystals and Approximants .....	113
<b>3</b>	<b>Other Mechanisms of Internal Friction.....</b>	<b>121</b>
3.1	Introduction .....	121
3.2	Internal Friction at Phase Transformations .....	121
3.2.1	Martensitic Transformation .....	121
3.2.2	Polymorphic and Other Phase Transformations .....	129
3.2.3	Precipitation and Dissolution of a Second Phase .....	133
3.3	Dislocation-Related Amplitude-Dependent Internal Friction (ADIF) .....	136
3.4	Magneto-Mechanical Damping .....	144
3.5	Mechanisms of Damping in High-Damping Materials .....	148
<b>4</b>	<b>Internal Friction Data of Crystalline Metals and Alloys (Tables) .....</b>	<b>157</b>
4.1	Copper and Noble Metals and their Alloys .....	158
4.2	Alkaline and Alkaline Earth Metals and their Alloys .....	189
4.3	Metals of the IIA–VIIA Groups and their Alloys .....	196
4.4	Metals of the IIIB Group, Rare Earth Metals and Actinides .....	223
4.4.1	Rare Earth and Group IIIB Metals .....	223
4.4.2	Actinides .....	235
4.5	Metals of the IVB Group .....	238
4.5.1	Titanium and its Alloys .....	238
4.5.2	Zirconium and its Alloys .....	263
4.5.3	Hafnium and its Alloys .....	275
4.6	Metals of the VB Group .....	276
4.6.1	Vanadium and its Alloys .....	276
4.6.2	Niobium and its Alloys .....	287
4.6.3	Tantalum and its Alloys .....	321
4.7	Metals of the VIB Group .....	331
4.7.1	Chromium and its Alloys .....	331
4.7.2	Molybdenum and its Alloys .....	338
4.7.3	Tungsten and its Alloys .....	346
4.8	Metals of the VIIIB group: Mn and Re .....	352
4.9	Iron and Iron-Based Alloys .....	356
4.9.1	Fe (“pure”) .....	357
4.9.2	Fe–Interstitial Atoms (C, H, N), Other Elements (As, B, Ce, La, P, S, Y) <1%, and Low Carbon Steels .....	360
4.9.3	Fe–(<3%)Me–(C, N) and Low Alloyed Steels (Me = Metal) .....	367
4.9.4	Fe–Al Alloys and Steels (Mainly bcc and bcc-Based) .....	372

4.9.5 Fe-Al-Based Ternary and Multi-Component Alloys (e.g., Fe-Al-Cr, Fe-Al-Ge, Fe-Al-Si, etc.) . . . . .	380
4.9.6 Fe-Co, -Ge, -Si, -Mo, -V, -W Alloys . . . . .	385
4.9.7 Fe-Cr-Based Steels and Alloys . . . . .	389
4.9.8 Fe-Mn-Based Steels and Alloys . . . . .	397
4.9.9 Fe-Ni-Based Steels and Alloys . . . . .	402
4.9.10 Other Fe-Based Multi-Component Alloys . . . . .	408
4.10 Co, Ni and their Alloys . . . . .	413
<b>5 Internal Friction Data of Special Types of Metallic Materials (Tables) . . . . .</b>	<b>423</b>
5.1 Hydrogen-Absorbing Alloys . . . . .	424
5.2 Metallic Glasses . . . . .	439
5.3 Quasicrystals and Other Complex Alloys . . . . .	449
<b>References . . . . .</b>	<b>453</b>
<b>Index . . . . .</b>	<b>535</b>
