Preface	v
List of Contributors	xvii
1 Thermodynamics and Kinetics of Quantum Dot Growth	
<i>Vitaly Shchukin, Eckehard Schöll and Peter Kratzer</i>	1
1.1 Introduction	2
1.1.1 Length and Time Scales	3
1.1.2 Multiscale Approach to the Modeling of Nanostructures	4
1.2 Atomistic Aspects of Growth	5
1.2.1 Diffusion of Ga Atoms on GaAs(001)	5
1.2.2 Energetics of As ₂ Incorporation During Growth	5
1.2.3 Kinetic Monte Carlo Simulation of GaAs Homoepitaxy	6
1.2.4 Wetting Layer Evolution	9
1.3 Size and Shapes of Individual Quantum Dots	11
1.3.1 Hybrid Approach to Calculation of the Equilibrium Shape of Individual Quantum Dots	11
1.3.2 Role of High-Index Facets in the Shape of Quantum Dots	13
1.3.3 Shape Transition During Quantum Dot Growth	14
1.3.4 Constraint Equilibrium of Quantum Dots with a Wetting Layer ..	15
1.4 Thermodynamics and Kinetics of Quantum Dot Ensembles	19
1.4.1 Equilibrium Volume of Strained Islands versus Ostwald Ripening	19
1.4.2 Crossover from Kinetically Controlled to Thermodynamically Controlled Growth of Quantum Dots	22
1.4.3 Tunable Metastability of Quantum Dot Arrays	25
1.4.4 Evolution Mechanisms in Dense Arrays of Elastically Interacting Quantum Dots	27

1.5 Quantum Dot Stacks 29

 1.5.1 Transition between Vertically Correlated and Vertically Anticorrelated Quantum Dot Growth 29

 1.5.2 Finite Size Effect: Abrupt Transitions between Correlated and Anticorrelated Growth 31

 1.5.3 Reduction of a Size of a Critical Nucleus in the Second Quantum Dot Layer 32

1.6 Summary and Outlook 34

References 35

2 Control of Self-Organized In(Ga)As/GaAs Quantum Dot Growth

Udo W. Pohl and André Strittmatter 41

2.1 Introduction 41

2.2 Evolution and Strain Engineering of InGaAs/GaAs Quantum Dots 42

 2.2.1 Evolution of InGaAs Dots 42

 2.2.2 Engineering of Single and Stacked InGaAs QD Layers 46

2.3 Growth Control of Equally Shaped InAs/GaAs Quantum Dots 50

 2.3.1 Formation of Self-Similar Dots with a Multimodal Size Distribution 51

 2.3.2 Kinetic Description of Multimodal Dot-Ensemble Formation 54

2.4 Epitaxy of GaSb/GaAs Quantum Dots 56

 2.4.1 Onset and Dynamics of GaSb/GaAs Quantum-Dot Formation 56

 2.4.2 Structure of GaSb/GaAs Quantum Dots 58

2.5 Device Applications of InGaAs Quantum Dots 60

 2.5.1 Edge-Emitting Lasers 60

 2.5.2 Surface-Emitting Lasers 61

2.6 Conclusion 62

References 63

3 In-Situ Monitoring for Nano-Structure Growth in MOVPE

Markus Pristovsek and Wolfgang Richter 67

3.1 Introduction 67

3.2 Reflectance 69

3.3 Reflectance Anisotropy Spectroscopy (RAS) 71

 3.3.1 RAS Spectra and Surface Reconstruction 72

 3.3.2 Monolayer Oscillations 74

 3.3.3 Monitoring of Carrier Concentration 79

3.4 Scanning Tunneling Microscopy (STM) 82

3.5 Conclusion 84

References 85

4 Bottom-up Approach to the Nanopatterning of Si(001)

R. Koch 87

4.1 Quantum Dot Growth on Semiconductor Templates 87

4.2 $(2 \times n)$ Reconstruction of Si(001) 88

4.3	Monte Carlo Simulations on the ($2 \times n$) Formation	90
4.4	Scanning Tunneling Microscopy Results	92
4.5	Summary and Outlook	94
	References	95

5 Structural Characterisation of Quantum Dots by X-Ray Diffraction and TEM

	<i>R. Köhler, W. Neumann, M. Schmidbauer, M. Hanke, D. Grigoriev, P. Schäfer, H. Kirmse, I. Häusler and R. Schneider</i>	97
5.1	Introduction	97
5.2	Liquid Phase Epitaxy of SiGe/Si: A Model System for the Stranski–Krastanow Process	99
	5.2.1 Dot Evolution in a Close-to-Equilibrium Regime	99
5.3	(In,Ga)As Quantum Dots on GaAs	103
	5.3.1 Shape, Size, Strain and Composition Gradient in InGaAs QD Arrays	103
	5.3.2 Chemical Composition of (In,Ga)As QDs Determined by TEM ..	107
	5.3.3 Controlling 3D Ordering in (In,Ga)As QD Arrays through GaAs Surface Orientation	109
5.4	Ga(Sb,As) Quantum Dots on GaAs	113
	5.4.1 Structural Characterisation of Ga(Sb,As) QDs by High-Resolution TEM Imaging	117
	5.4.2 Chemical Characterisation of Ga(Sb,As) QDs by HAADF STEM Imaging	118
	References	119

6 The Atomic Structure of Quantum Dots

	<i>Mario Dähne, Holger Eisele and Karl Jacobi</i>	123
6.1	Introduction	123
6.2	Experimental Details	124
6.3	STM Studies of InAs Quantum Dots on the Growth Surface	124
6.4	XSTM Studies of Buried Nanostructures	127
	6.4.1 InAs Quantum Dots	127
	6.4.2 InGaAs Quantum Dots	131
	6.4.3 GaSb Quantum Dots	134
6.5	Conclusion	135
	References	136

7 Theory of Excitons in InGaAs/GaAs Quantum Dots

	<i>Andrei Schliwa and Momme Winkelnkemper</i>	139
7.1	Introduction	139
7.2	Interrelation of QD-Structure, Strain and Piezoelectricity, and Coulomb Interaction	140
	7.2.1 The Binding Energies of the Few Particle Complexes	140
7.3	Method of Calculation	143
	7.3.1 Calculation of Strain	144

7.3.2	Piezoelectricity and the Reduction of Lateral Symmetry	145
7.3.3	Single Particle States	147
7.3.4	Many-Particle States	148
7.3.5	The Configuration Interaction Model	148
7.3.6	Interband Spectra	150
7.4	The Investigated Structures: Variation of Size, Shape and Composition . .	150
7.5	The Impact of QD Size	151
7.5.1	The Role of the Piezoelectric Field	153
7.6	The Aspect Ratio	155
7.6.1	Vertical Aspect Ratio	155
7.6.2	Lateral Aspect Ratio	157
7.7	Different Composition Profiles	157
7.7.1	Inverted Cone-Like Composition Profile	157
7.7.2	Annealed QDs	159
7.7.3	InGaAs QDs with Uniform Composition	159
7.8	Correlation vs. QD Size, Shape and Particle Type	159
7.9	Conclusions	162
	References	163
8 Phonons in Quantum Dots and Their Role in Exciton Dephasing		
	<i>F. Grosse, E.A. Muljarov and R. Zimmermann</i>	165
8.1	Introduction	165
8.2	Structural Properties of Semiconductor Nanostructures	166
8.3	Theory of Acoustic Phonons in Quantum Dots	166
8.3.1	Continuum Elasticity Model of Phonons	167
8.3.2	Phonons in Quantum Dots	170
8.4	Exciton-Acoustic Phonon Coupling in Quantum Dots	171
8.5	Dephasing of the Exciton Polarization in Quantum Dots	173
8.5.1	Single Exciton Level: Independent Boson Model	174
8.5.2	Multilevel System: Real and Virtual Phonon-Assisted Transitions	176
8.5.3	Application to Coupled Quantum Dots	182
8.6	Summary	184
	References	185
9 Theory of the Optical Response of Single and Coupled Semiconductor Quantum Dots		
	<i>C. Weber, M. Richter, S. Ritter and A. Knorr</i>	189
9.1	Introduction	189
9.2	Theory	190
9.2.1	Quantum Dot Model	190
9.2.2	Hamiltonian	191
9.2.3	Mathematical Formalisms	193
9.3	Single Quantum Dot Response	196
9.3.1	Linear Absorption Spectra and Quantum Optics	196
9.3.2	Semiclassical Nonlinear Dynamics	199

9.4 Two Coupled Quantum Dots 201
 9.4.1 Absorption Spectra 202
 9.4.2 Excitation Transfer 202
 9.4.3 Rabi Oscillations 203
 9.4.4 Pump-Probe/Differential Transmission Spectra 204
 9.5 Multiple Quantum Dots 205
 9.5.1 Four-Wave-Mixing: Photon Echo in Quantum Dot Ensembles . . . 205
 9.5.2 Absorption of Multiple Coupled Quantum Dots 205
 9.5.3 Energy Transfer of Multiple Coupled Quantum Dots 206
 9.6 Conclusion 206
 References 207

10 Theory of Nonlinear Transport for Ensembles of Quantum Dots

G. Kießlich, A. Wacker and E. Schöll 211
 10.1 Introduction 211
 10.2 Coulomb Interaction within a Quantum Dot Layer 211
 10.3 Transport in Quantum Dot Stacks 213
 10.4 Current Fluctuations and Shot Noise 214
 10.5 Full Counting Statistics and Decoherence in Coupled Quantum Dots . . . 216
 10.6 Conclusion 218
 References 219

11 Quantum Dots for Memories

M. Geller and A. Marent 221
 11.1 Introduction 221
 11.2 Semiconductor Memories 222
 11.2.1 Dynamic Random Access Memory (DRAM) 222
 11.2.2 Nonvolatile Semiconductor Memories (Flash) 223
 11.2.3 A QD-based Memory Cell 224
 11.3 Charge Carrier Storage in Quantum Dots 226
 11.3.1 Experimental Technique 226
 11.3.2 Carrier Storage in InGaAs/GaAs Quantum Dots 228
 11.3.3 Hole Storage in GaSb/GaAs Quantum Dots 229
 11.3.4 InGaAs/GaAs Quantum Dots with Additional AlGaAs Barrier . . . 230
 11.4 Conclusion and Outlook 233
 References 235

12 Visible-Bandgap II–VI Quantum Dot Heterostructures

Ilya Akimov, Joachim Puls, Michael Rabe and Fritz Henneberger 237
 12.1 Introduction 237
 12.2 Epitaxial Growth 238
 12.3 Few-Particles States and Their Fine Structure 241
 12.3.1 Excitons and Biexcitons 241
 12.3.2 Trions in Charged Quantum Dots 243

12.4 Coherent Control of the Exciton–Biexciton System 245

12.5 Spin Relaxation of Excitons, Holes, and Electrons 247

 12.5.1 Exciton Quantum Coherence 247

 12.5.2 Hole Spin Lifetime 248

 12.5.3 Spin Dynamics of the Resident Electron 249

12.6 Diluted Magnetic Quantum Dots 251

References 253

13 Narrow-Gap Nanostructures in Strong Magnetic Fields

T. Tran-Anh and M. Ortenberg 255

13.1 Introduction 255

13.2 Materials: HgSe/HgSe:Fe 256

13.3 Fabrication of HgSe/HgSe:Fe Nanostructures 256

 13.3.1 Quantum Wells 257

 13.3.2 Roof-Ridge Quantum Wires 258

 13.3.3 Quantum Dots 259

13.4 Electronic Characterization of the HgSe/HgSe:Fe Nano-Structures in Strong Magnetic Fields 262

 13.4.1 High-Field Magneto Transport 262

 13.4.2 Infrared Magneto-Resonance Spectroscopy 263

13.5 Summary 267

References 267

14 Optical Properties of III–V Quantum Dots

Udo W. Pohl, Sven Rodt and Axel Hoffmann 269

14.1 Introduction 269

14.2 Confined States and Many-Particle Effects 270

 14.2.1 Renormalization 270

 14.2.2 Phonon Interaction 274

 14.2.3 Electronic Tuning by Strain Engineering 276

 14.2.4 Multimodal InAs/GaAs Quantum Dots 278

14.3 Single InAs/GaAs Quantum Dots 281

 14.3.1 Spectral Diffusion 281

 14.3.2 Size-Dependent Anisotropic Exchange Interaction 282

 14.3.3 Binding Energies of Excitonic Complexes 285

 14.3.4 Data Storage Using Confined Trions 286

 14.3.5 Electronic Tuning by Annealing 287

14.4 Optical Properties of InGaN/GaN Quantum Dots 288

 14.4.1 Time-Resolved Studies on Quantum Dot Ensembles 289

 14.4.2 Single-Dot Spectroscopy 292

14.5 Summary 296

References 298

15 Ultrafast Coherent Spectroscopy of Single Semiconductor Quantum Dots

Christoph Lienau and Thomas Elsaesser 301

15.1 Introduction 301

15.2 Interface Quantum Dots 303

15.3 Coherent Spectroscopy of Interface Quantum Dots: Experimental
Technique 305

15.4 Coherent Control in Single Interface Quantum Dots 308

 15.4.1 Ultrafast Optical Nonlinearities of Single Interface Quantum Dots 308

 15.4.2 Rabi Oscillations in a Quantum Dot 312

 15.4.3 Optical Stark Effect: Ultrafast Control of Single Exciton
 Polarizations 315

15.5 Coupling Two Quantum Dots via the Dipole–Dipole Interaction 319

15.6 Summary and Conclusions 323

References 325

16 Single-Photon Generation from Single Quantum Dots

Matthias Scholz, Thomas Aichele and Oliver Benson 329

16.1 Introduction 329

16.2 Single Quantum Dots as Single-Photon Emitters 331

 16.2.1 Photon Statistics of Single-Photon Emitters 331

 16.2.2 Micro-Photoluminescence 332

 16.2.3 Single Photons from InP Quantum Dots 333

16.3 Multiphoton Emission from Single Quantum Dots 334

16.4 Realization of the Ultimate Limit of a Light Emitting Diode 339

16.5 Applications in Quantum Information Processing 343

 16.5.1 Quantum Key Distribution 343

 16.5.2 Quantum Computing 344

16.6 Outlook 346

References 347
